

AmiCell[®] SMS ALCHEMY EYE

IT Infrastructure Monitoring You Can Trust

Alchemy Eye is a network monitoring program that continuously monitors network server availability and performance. In the event of almost any computer error, warning or critical event, Alchemy Eye can alert the network administrator(s) by SMS Messages, Email, Console Messages, etc. and invoke remedial actions and measures to rectify a computer status.

This helps protect your company's data and reduces the likelihood of costly network failures. If a server goes down, Alchemy Eye automatically notifies the network administrator by predefined messages and writes a detailed log file.

Alert Escalations can be implemented to ensure that Alerts are responded to and rectified!

Alchemy Eye provides seamless integration with the AmiCell[®] SMS Server for Automatic SMS Notifications.

What Alchemy Eye can do for you:

- Notices of Server Malfunctions
- Maintains Detailed Log Files
- Builds Customer Server Availability Reports
- Executes Programs / Restarts Services

Alchemy Eye reduces the likelihood of costly network failures and assists in the protection of valuable data!

AmiCell[®] SMS ALCHEMY EYE

Monitoring

Alchemy Eye monitors computer functions and services using more than 50 Internet-, Network-, Database- and Windows protocols and services including:

- ICMP (ping) network monitoring
- NT Event Log computer monitoring
- HTTP(S)/FTP URL internet monitor (with or without content filters)
- Free Disk Space hardware monitor
- NT Service State server monitor
- Oracle Server network monitor
- MS SQL Server monitor
- SQL query result monitor
- Monitoring any SQL server through ODBC
- External application execution
- File existence monitoring
- NetBIOS LAN monitor
- SMTP/POP3 mail server monitor
- IPX/SPX file server monitor
- RAS Server dial-up monitor
- VBScript program
- Telnet Server monitor
- NNTP Server monitor
- IMAP mail server monitor
- BDE servers monitoring
- LDAP servers monitoring
- TCP / IP monitor
- Plug-ins and add-on's

Log Files

Alchemy Eye network monitor can log application events to a log file. Different log file detail levels (none/normal/full) and log file formats (text or HTML) can be configured to suit your needs.

Alerts

Alchemy Eye automatically notifies the Network Administrator(s) about server malfunction events. In the case of a network failure this network monitor can:

- Send SMS Messages to Recipients or Groups of Recipients
- Escalate SMS Sending until a Recipient acknowledges the Alerts via reply / return SMS
- Send email alerts
- Send messages to WinPopup application or Windows NT/2000/XP Messenger Services
- Restart remote computers or services
- Execute SQL scripts
- Execute BDE Queries
- Run VB Scripts
- Run Java Scripts
- Write NT Event Log
- HTTP Alerts
- Execute programs
- Play sounds
- Execute VBScript programs
- Notify ICQ users
- Fire plug-in events

Reports

With Alchemy Eye you can build server availability reports showing how long your servers were unavailable, what network errors occurred during the monitoring and much, much more. Moreover, with the new version of the network monitoring program you can create your own statistics reports or order new reports.
