OVERVIEW

Email to SMS can be used for SMS sending from any email program or for SMS integration from a 3rd party system able to generate an email.

AmiCell® SMS hosts a secure Email to SMS service that allows you to send an email in a specific format to the AmiCell® SMS Access Point's dedicated email address which in turn sends out SMS messages as specified in your email.

Emails may be sent from a 3rd party source without human intervention or submitted manually by a user.

Once an Email to SMS request is received and all security information verifies, the AmiCell® SMS Access Point will reply with a security response either via SMS or return Email (if manually submitted). By responding to the security response the SMS requests will be authorized automatically.

AmiCell® SMS will send automated SMS reports on a daily basis to the Email to SMS user. The reports will include Delivery, Errors, Replies and Invalid Numbers in a spreadsheet format.

FEATURES

Email to SMS features include:

- ✓ Bulk and Single SMS sending.
- ✓ Integrate 3rd party applications using various methods: single SMS sending in email body, bulk SMS sending via spreadsheet or text file attachment.
- ✓ Recipients can reply to SMS messages.
- ✓ Extensive reports including sent messages, received messages and errors.
- ✓ Security response verification via email or SMS (if required).

PRICES

We will most probably beat any written quotation. Contact us for special rates. See our website for Terms and Conditions.

Choose a payment option that suits your needs: the subscription option allows you to pay for your SMS usage in arrears with debit order and the pre-paid option allows you to purchase SMS credits as and when you need them (much like you would buy airtime for your pre-paid mobile device). SMS credits never expire. *All prices excl. VAT.*
