

Integrate your applications or websites with an easy API via the Internet. No software required.

- ✓ no software required
- ✓ integration
- ✓ high-speed sending

## OVERVIEW

AmiCell® SMS hosts a fast, secure Internet SMS gateway to enable software developers to integrate business systems or websites with SMS functionality.

This is ideal if you do not require a software interface and do not require address book management.

## FEATURES

AmiCell® SMS Gateway features include:

- ✓ Bulk and Single SMS sending.
- ✓ Integrate 3rd party applications using various methods:
  - File Transfer Protocol (FTP):** SMS requests for delivery will be via push (upload) and delivery, error and reply reports via pull (download).
  - URL Post:** A script residing on the APN and is called with specified parameters from a remote location.
- ✓ Recipients can reply to SMS messages.
- ✓ Extensive reports available for extraction including sent messages, received messages and errors.

## PRICES

We will most probably beat any written quotation. Contact us for special rates. See our website for Terms and Conditions.

Choose a payment option that suits your needs: the subscription option allows you to pay for your SMS usage in arrears with debit order and the pre-paid option allows you to purchase SMS credits as and when you need them (much like you would buy airtime for your pre-paid mobile device). SMS credits never expire. *All prices excl. VAT.*
