

AmiCell® SMS GATEWAY CLIENT

AmiCell®

SMS

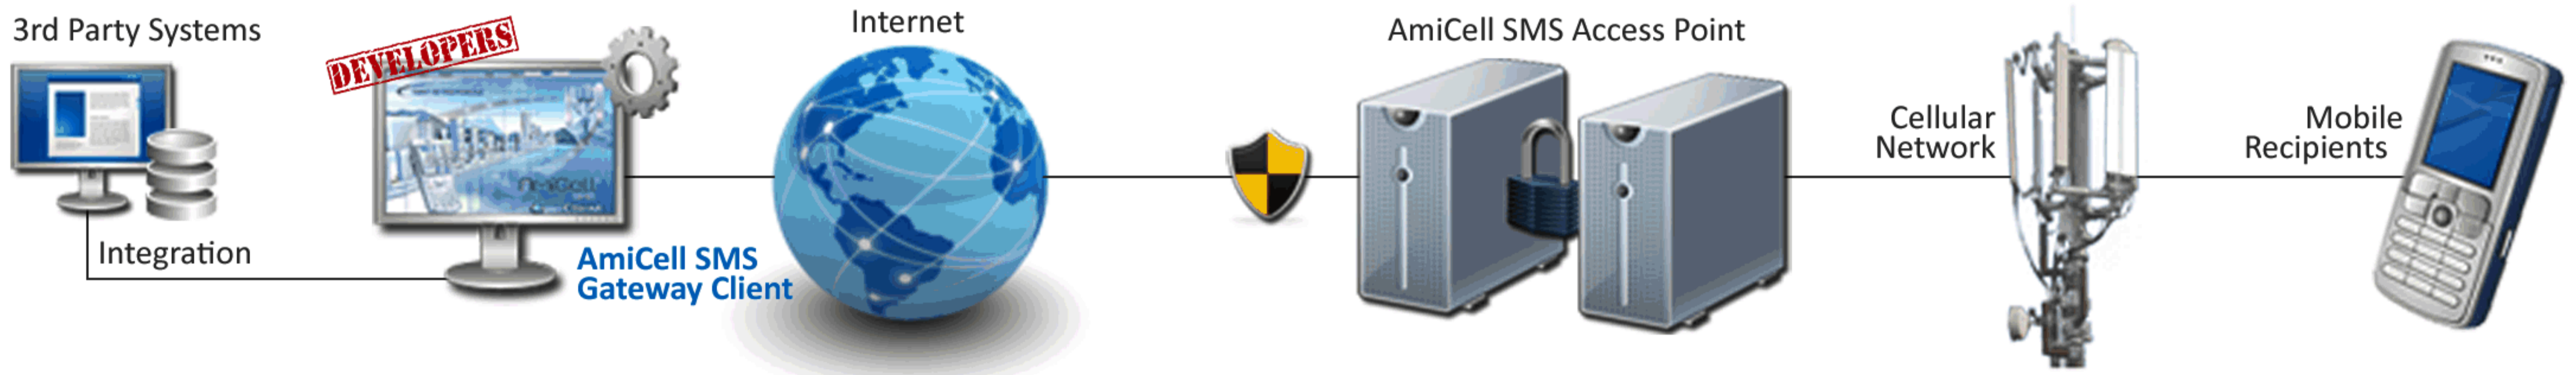

HOW IT WORKS

The AmiCell® SMS Gateway Client connects via the Internet to send and receive SMS messages via the AmiCell® SMS Access Point. The AmiCell® SMS Gateway Client is software that has the ability to receive SMS requests from external database systems, websites or customized software. It automatically manages SMS sending, SMS replies, delivery reports and error logs. All you require is Internet access. The AmiCell® SMS Gateway Client manages bi-directional communication to the AmiCell® SMS Access Point making your integration project a breeze!

Multiple user account functionality makes it possible to manage more than one billing account and very easy to manage. The AmiCell® SMS Gateway Client utilizes the same integration technology as the AmiCell® SMS Server via a 3rd Party File Scanner and has Windows NT Services functionality to ensure robust 24/7 availability.

The AmiCell® SMS Gateway Client has two modes. When the File Scanner is stopped, it can be used as a normal bulk SMS sender. When started, the Gateway Client manages the integration automatically without human intervention including reply, delivery and error log retrieval.

The AmiCell® SMS Gateway Client brings you the integration capabilities of the AmiCell® SMS Server and the simplicity and high volume / high-speed messaging of the AmiCell® SMS Internet Client, all in one.

FEATURES

- SMS Bulk Sender
- Integration Capabilities
- Delivery Reports
- Historical Data
- Address Book
- Data Exporting
- Data Importing
