

AmiCell® SMS INTERNET CLIENT

AmiCell® SMS

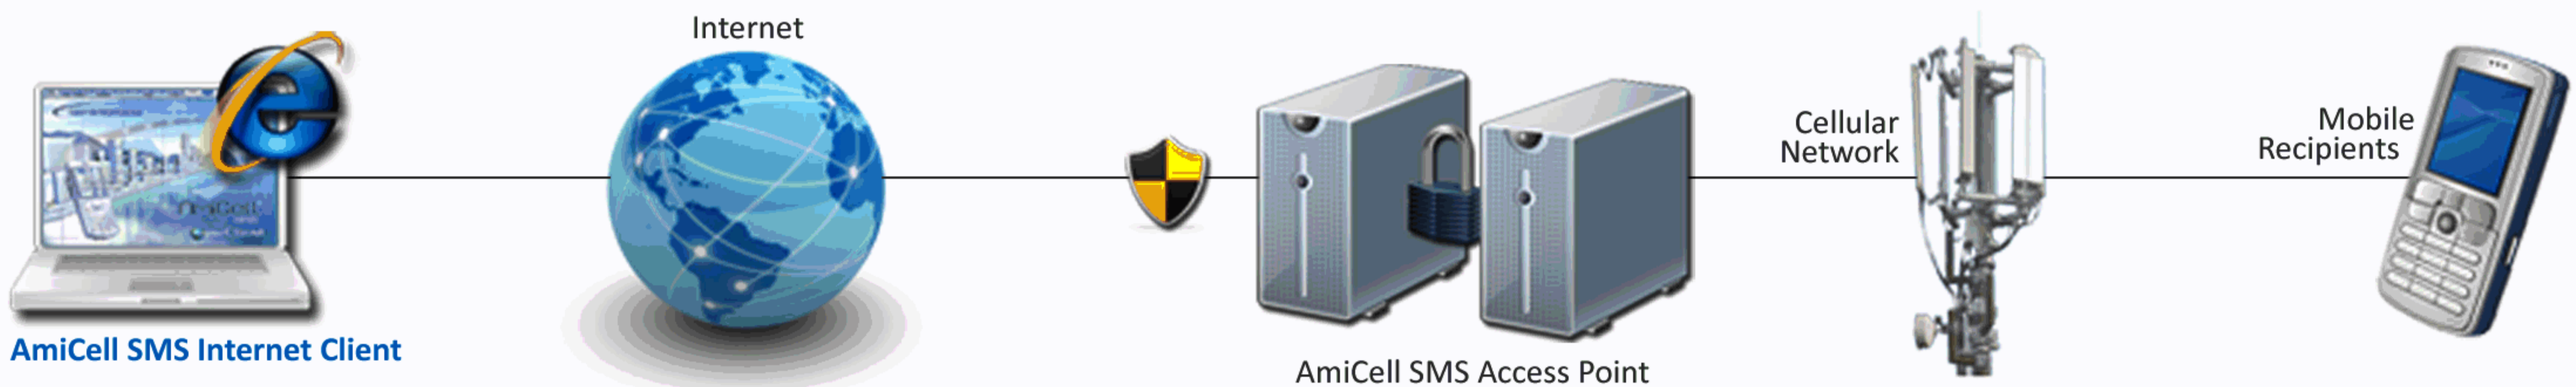

HOW IT WORKS

The AmiCell® SMS Internet Client is desktop application software that connects via the Internet to send and receive SMS messages via the AmiCell® SMS Access Point hosted by MicroTeq (No SMS Hardware required). The AmiCell® SMS Internet Client is a user friendly and effective tool to instantly send SMS messages, receiving replies, schedule messages for later delivery, and managing standard rate keyword campaigns.

The AmiCell® SMS Internet Client has a comprehensive address book for storing recipient contact details. The address consists of a three-tier storage structure so you can store you recipients in easy-to-access folders and groups. Detailed historical data of all SMS transactions, error logs, replies, usage statistics, etc. are stored locally on the computer and can at any time be exported to spreadsheets.

The AmiCell® SMS Internet Client has the ability to send large volumes of SMS Messages at a very high delivery rate through the AmiCell® SMS Access Point even if your Internet connection speed is slow. Being a desktop application, no internet delays are experienced when manipulating data. Your recipient contact details are stored safe on your own computer.

The AmiCell® SMS Internet Client is the perfect SMS tool for individuals, small or large organizations that requires an effective yet simple tool to send out bulk or single SMS messages at the click of a button.
