

Email To SMS

AmiCell[®]

SMS

HOW IT WORKS

Use the convenience of your Email Program to send and receive SMS messages.

MicroTeq hosts a secure Email to SMS service that allows you to automatically send an email in a specific format to the AmiCell[®] SMS Access Point's dedicated email address, specifically created for SMS messaging purposes and requires no human intervention.

Email to SMS supports both Single or Bulk SMS Requests.

Once an Email 2 SMS request is received and all security information verifies, the AmiCell[®] SMS Access Point will reply with a security response either via SMS or return Email. By responding to the security response the SMS requests will be automatically authorized.

The AmiCell APN will send automated SMS reports on a daily basis to the Email 2 SMS user. The reports will include Delivery, Errors, Replies and Invalid Numbers in spreadsheet format.
