

# AmiCell<sup>®</sup> SMS GATEWAY CLIENT

The AmiCell<sup>®</sup> SMS Gateway Client connects via the Internet to send and receive SMS Messages via the AmiCell<sup>®</sup> SMS Access Point. The AmiCell<sup>®</sup> SMS Gateway Client is a Desktop Application that has the ability to receive SMS requests from external database systems or customized software developed by 3rd Parties, and automatically manages SMS Sending, SMS Replies, Delivery and Error logs. All you require is Internet Access. The AmiCell<sup>®</sup> SMS Gateway Client manages bi-directional communication to the AmiCell SMS Access Point for you!

Multiple User Account functionality makes it possible to manage more than one account, making billing / SMS information easy to manage. The AmiCell<sup>®</sup> SMS Gateway Client utilizes the same Integration Technology as the AmiCell<sup>®</sup> SMS Server via a 3rd Party File Scanner and has Windows Services functionality to ensure robust 24/7 availability.

Send SMS Messages and Receive Replies via the Internet

# AmiCell<sup>®</sup> SMS GATEWAY CLIENT

The AmiCell<sup>®</sup> SMS Gateway Client incorporates the following functionality and System Modules:

**SMS Control Centre**  
 The SMS Control Centre provides the AmiCell<sup>®</sup> SMS Gateway Client with a user friendly interface to perform all the SMS sending and receiving. Create a list of target recipients in a list, enter and tailor / compose an SMS Message to send to the recipients and send the request to the Amicell SMS Access Point for processing. The 3rd Party File Scanner Automation is controlled from this interface for automated SMS delivery and receipt.

**3rd Party File Scanner** (Used for Business System Integration)  
 The 3rd Party File Scanner Plug-in module makes it possible for the AmiCell<sup>®</sup> SMS Gateway Client to receive requests from external database systems or customized software developed by 3rd Parties. With various interface configuration options, the integration with the AmiCell<sup>®</sup> SMS Gateway Client is hassle free and quick to incorporate!

**Historical Data/Delivery Reports**  
 AmiCell<sup>®</sup> SMS Gateway Client accesses and downloads the historical or SMS delivery data on the AmiCell<sup>®</sup> SMS Access Point by periods (year, month), Cellular Phone Recipients, error logs, etc. All historical data can be exported with selection filters to a Spread Sheet for further analysis.

**Recipient Address Book**  
 The Recipient Address Book provides the AmiCell<sup>®</sup> SMS Gateway Client with an Address Book or List of persons with Cellular Phones (referred to as a Recipient) residing on your own Computer. The aim of the Address Book is to have a pre-loaded and maintainable database to easily send an SMS Message to a Group of people.

**Data Import/Export**  
 Importing and Exporting from the AmiCell<sup>®</sup> SMS Gateway Client makes it possible to interface Recipient data to 3rd Party Software databases. If you already have a large recipient list in another program, you can export the data and easily import it to AmiCell<sup>®</sup>.

**PRICE PLANS**

AmiCell <sup>®</sup> SMS Gateway Client application (once-off)	R 895 each
Monthly Subscription Fee	R 50
