

**AmiCell<sup>®</sup> SMS  
INTERNET CLIENT**

The AmiCell<sup>®</sup> SMS Internet Client connects via the Internet to the AmiCell<sup>®</sup> SMS Access Point and receives SMS Messages via the AmiCell<sup>®</sup> SMS Access Point hosted by MicroTeq. The AmiCell<sup>®</sup> SMS Internet Client is a Desktop Application and can be installed on multiple computers to share the SMS functions via the AmiCell<sup>®</sup> SMS Access Point.

The AmiCell<sup>®</sup> SMS Internet Client incorporates the following functionality and System Modules:

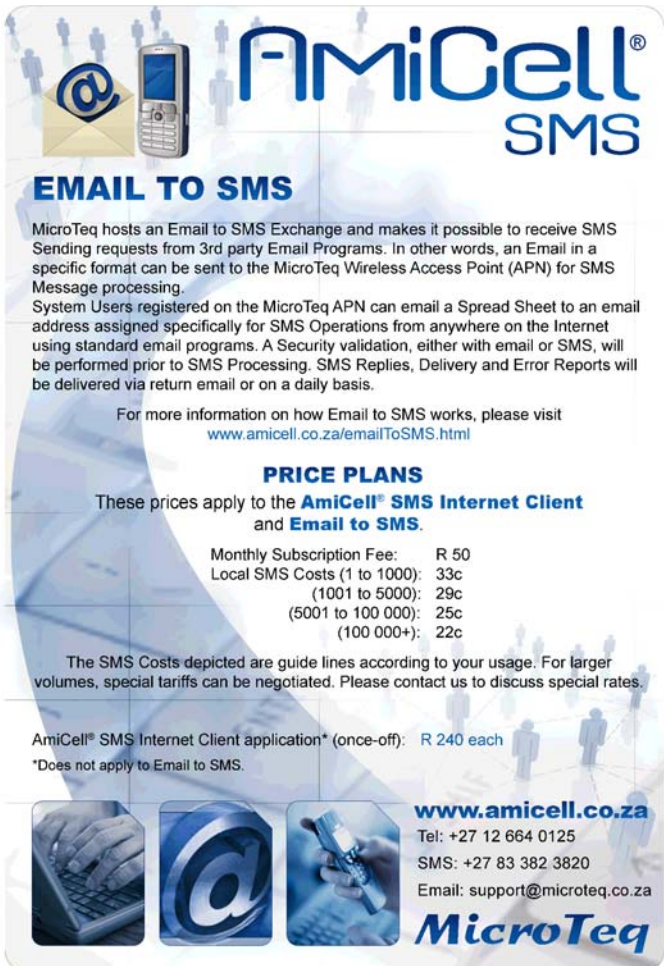

**SMS Control Centre**  
The SMS Control Centre provides the AmiCell<sup>®</sup> SMS Internet Client User with a User Friendly Interface to perform all the SMS Sending and Receiving.

**Historical Data/Delivery Reports**  
The AmiCell<sup>®</sup> SMS Internet Client accesses and downloads the historical or SMS delivery data on the AmiCell<sup>®</sup> SMS Access Point by periods (year, month), Cellular Phone Recipients, error logs, etc. All historical data can be exported with selection filters to a Spread Sheet for further analysis.

**Recipient Address Book**  
The Recipient Address Book provides the AmiCell<sup>®</sup> SMS Internet Client with an Address Book of Recipients residing on your own Computer.

**Data Import/Export**  
Importing and Exporting from the AmiCell<sup>®</sup> SMS Internet Client makes it possible to interface Recipient data to 3rd Party Software databases. If you already have a large recipient list in another program, you can export the data and easily import it to AmiCell<sup>®</sup>.

**AmiCell<sup>®</sup> SMS**

**EMAIL TO SMS**

MicroTeq hosts an Email to SMS Exchange and makes it possible to receive SMS Sending requests from 3rd party Email Programs. In other words, an Email in a specific format can be sent to the MicroTeq Wireless Access Point (APN) for SMS Message processing.

System Users registered on the MicroTeq APN can email a Spread Sheet to an email address assigned specifically for SMS Operations from anywhere on the Internet using standard email programs. A Security validation, either with email or SMS, will be performed prior to SMS Processing. SMS Replies, Delivery and Error Reports will be delivered via return email or on a daily basis.

For more information on how Email to SMS works, please visit
